ANNOUNCEMENT ON THE IMPACT OF THE JAPANESE DISASTER

Dear customers and business partners,

as all of you, we are greatly concerned about the disaster, which happened in Japan. All our thoughts are with those Japanese people and we hope that the situation will stabilize soon.

Actually our production partners are not directly involved as they are situated in China and Taiwan. So here it is no direct impact and production line is running well as usual.

Up to now it seems that there is no direct influence in any key-material coming from Japan. Especially the power shortage and control in Japan might result in longer leadtime of those key-materials required in some components.

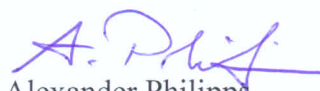

Display Elektronik GmbH is monitoring the situation and communicating with our supplier base to seek clarification.

With our policy and practice of working with forecast and buffer with both suppliers and customers we are well organized the next 1-2 month. For any longer distanced demand we strongly recommend to send us your order just now already to ensure smooth and uninterrupted production runs.

We shall look forward to your continuous support and understanding. We understand your concerns and we are afraid for any inconvenience causes, but Display Elektronik GmbH would like to have your understanding and cooperation.

Yours sincerely

Michael Hußmann
- General Manager -

Alexander Philipps
- QC Manager -
