To whom it may concern

Trajouce, Portugal, April 13, 2011

The critical situation in Japan is worrying everybody because of the human disaster and the heavy damages to land and property.

However, as business continues, we want to inform you, that our business-relations with Japanese suppliers are very limited and that we will not receive any supplies over the next coming months. To our best knowledge, our production and our products are not affected by any risk of shortage or nuclear contamination.

Sincerely Yours  
Vitrohm Portuguesa Lda.

Eberhard Muranka  
Managing Director
