PRODUCT CHANGE NOTIFICATION

Hereby we have to inform you that the existing tooling for the SA/SC50-21 reflector is worn-out and will be replaced immediately with new tooling. Product made from this new tooling will have slightly different dimensions.

Kingbright's **SA/SC50-21** series will now become obsolete and will be replaced by the new **SA/SC50-31** series!

The old **SA/SC50-21** display has dimensions of 108,0 mm (width) x 180,2 mm (height) x 15,6 mm (thickness) and a segment width of 8,8 mm.

The new **SA/SC50-31** series has dimensions of 107,5 mm (width) x 179,5 mm (height) x 15,2 mm (thickness) and a segment width of 9,0 mm.

In addition the shape of the segments has been changed.

The pin layout of the new **SA/SC50-31** series remains the same as for the now obsolete **SA/SC50-21** series.

Because **SA/SC50-21** was not popular, Kingbright doesn't keep stock of the reflectors. Because of the unexpectedly rapid wearing of the tooling, Kingbright will supply the new **SA/SC50-31** series only!

Mit freundlichen Grüßen /
With best regards

Udo Reinhold
