

## PRODUCT CHANGE NOTIFICATION

Out of technical reasons Kingbright has made a change at their SMD-LEDs KA-3528 and KA-3020 series.

The shape of the connecting contacts has been changed in the new series KA-3528**A** and KA-3020**A**. The electrical and optical features of these types will remain unchanged compared with the known KA-3528 and KA-3020 series.

As a result of this change Kingbright's LED Stripes LSL-062 and LSL-063 series will be assembled now with the new KA-3528**A** series. For making this change transparent, the part numbers for Kingbright's LED Stripes will be changed to LSL-062**A** and LSL-063**A** series.

From mid January 2008 we will supply the new products only!

We will send you spec sheets and samples of the changed products upon request.

Best regards

**Udo Reinhold**
