PRODUCT CHANGE NOTIFICATION

Hereby we have to inform you that the #2 leadframe used for Kingbright's Phototransistors L-32P3C / L-32P3BT and L-932P3C / L-932P3BT is not more available.

Kingbright has to use a new leadframe for producing the 3mm Phototransistors now. For this reason Kingbright has changed the part numbers to

- L-3DP3C (water-clear lens)
- L-3DP3BT (blue transparent lens)

- L-93DP3C (water-clear lens)
- L-93DP3BT (blue transparent lens)

From now we will supply the new products only!

We will send you spec sheets and samples of the above listed Phototransistors upon request.

Best regards

Udo Reinhold

Managing Director
